THE ACTIVE ANKLE VOLT

CARBON CHARGED, LIGHTER WEIGHT, MORE DURABLE,

Active Ankle Volt Ankle Brace

Active Ankle innovation prevails again with the Volt. Carbon-charged, this ankle brace offers the best protection and support, with an increase in range of motion, enhanced custom padding, and less bulk. Made with new carbon technologies, the Volt is lightweight and flexible without compromising its supportive strength. Designed with a thinner profile, this version of the Active Ankle fits better in volleyball shoes than ever before.

- Carbon Charged Protection – unique blend of carbon and polypropylene that makes this brace lightweight, durable, and flexible.
- Integrated strengthening ribs create thinner profile for better fit in the shoe without compromising the brace's strength and support.
- Custom cut and molded, fabric lined EVA pads offer increased durability and comfort
- Unique, secure split strap closure system offers greater comfort and adjustability.
